

September 30th, 2020

Dear Customer,

Driven by values (Passion, Boldness, Reliability and Commitment), in the face of an unparalleled health crisis, we have been able to launch new solutions worldwide by developing high-technicity health protection products in record time: Antimicrobial protective films, hand sanitizer gel dispensers, disinfection tunnels under the brand Lainière Santé by Novacel.

With a deep-felt wish to demonstrate solidarity, we are continuing to support our staff and their families, the health professions and in all probability your own organization to help you resume and continue your activities in optimum sanitary conditions.

Every single day during this period of intense crisis our optimism has pushed us to come up with solutions that promote a sustainable future. For that reason, our product offering has been expanded with a range of eco-responsible technological solutions – the Oxygen range.

Alongside such innovations, we have launched an e-sales platform - www.novacel.store – to further enhance the service we provide to you. We are striving for having the best customer experience.

Under the testing circumstances of what is an exceptional health and economic context, we have proven ourselves capable of very great resilience. Backed by our human and industrial agility and our global logistics coverage, we continue to be mobilized and it is with pride that we will remain constantly at your side.

We wish to thank you for your trust and your support.

We care about your products, we care about You.

Richard MARCHANT
Managing Director
Chargeurs Protective Films
